

TOXIC CHEMICALS IN OUR DRINKING WATER THREATEN OUR KIDS' HEALTH

TOXIC PFAS chemicals are linked to permanent health issues like cancer, autoimmune disease and a weakened immune system.

CHRISTINE MORSE

**WILL CLEAN UP OUR
WATER & PROTECT
OUR HEALTH**

Christine Morse's top priority is protecting the health of our kids and most vulnerable. Toxic PFAS chemicals linked to cancer, a weakened immune system and other diseases have been found in the drinking water of more than 1.9 million Michiganders, putting our health further at risk.¹

As State Representative, Christine Morse will clean up toxic pollution in our drinking water and make polluters foot the bill for the cleanup, not taxpayers.
